Dear Mr Ansari

**Pollution Prevention and Control Regulations 2000  
Transfer of Part B Authorised Process (number 159) to LAPPC Permit**

From 1<sup>st</sup> April 2000 a new pollution control regime was introduced by the Pollution Prevention and Control Regulations 2000. This will affect your Part B installation that is currently covered by the Environmental Protection Act 1990.

The Regulations introduce three systems for regulation of specified industrial installations. The Environment Agency will regulate A1 installations and the Local Authority regulates A2 and Part B installations. An integrated environmental approach will be applied to A2 installations which means that emissions to air, water and land, plus a range of other activities with an environmental impact must be considered. Part B installations which are currently regulated by local authorities for air emissions will remain subject to air-only regulation.

The transfer of existing part B processes into the new local authority pollution prevention and control (LAPPC) regime will take place over a phased timetable and require process operators to obtain a permit to operate rather than an authorisation.

The transfer date for your industry sector was 1<sup>st</sup> April 2005. As an existing Part B process the existing authorisation has automatically become a "deemed application" for LAPPC purposes. There is therefore no need for you to apply for a permit or pay an additional fee.

I am writing to you as the Registered Office for the above authorisation to inform you that the deemed application for your process has been accepted by the local authority and that this Section is required to determine the application within 12 months. When the permit is issued it will include conditions aimed at reducing and preventing pollution similar to those in the authorisation.

In general the transfer to a permit will be simply an administrative exercise, however, in consideration of the application the local authority must consider if the operator will be able to

comply with the conditions likely to be imposed. If this is unlikely the local authority can refuse to grant the permit.

This Section may contact you in the future to discuss determination of the application and permit conditions. However if you require any further information, please do not hesitate to contact us.

A letter of this nature has also been sent to the site address for their information.

Yours sincerely

Michelle Muller

23 February 2003

Dear Sir

**Pollution Prevention and Control Act 1999 and the Pollution Prevention and Control Regulations 2000 – Permit to Operate a Prescribed Installation**

**Process Address: Mobile activity operated by offices at 1 Rye Hill Office Park, Birmingham Road, Coventry**

From 1<sup>st</sup> April 2000 a new pollution control regime was introduced by the Pollution Prevention and Control Regulations 2000. This affects your Part B installation that was covered by the Environmental Protection Act 1990.

The Regulations introduce three systems for regulation of specified industrial installations. The Environment Agency will regulate A1 installations and the Local Authority regulates A2 and Part B installations. An integrated environmental approach will be applied to A2 installations which means that emissions to air, water and land, plus a range of other activities with an environmental impact must be considered. Part B installations which are currently regulated by local authorities for air emissions will remain subject to air-only regulation.

The transfer of existing part B processes into the new local authority pollution prevention and control (LAPPC) regime will take place over a phased timetable and require process operators to obtain a permit to operate rather than an authorisation. The transfer date for your industry sector was 1<sup>st</sup> April 2003. As an existing Part B process your existing authorisation automatically became a "deemed application" for LAPPC purposes. There was therefore no need for you to apply for a permit or pay an additional fee.

Following consideration of your deemed application, the City Council has granted your permit. This is attached. In the majority of cases the same conditions have been used that were in your authorisation, although there has been some review and re-numbering.

If you wish to discuss your new permit please contact me on the number above. You do a right of appeal against any of the conditions, and the supplementary notes in appendix 1 of the permit outline the appeals process. You will also note from the supplementary notes that there are also

changes in other areas for example, how the permit is transferred, or how you apply for changes to the permit.

The new permit supersedes your previous authorisation that is now considered to be invalid. Your permit should be retained in a safe place, and passed onto your Coventry site office where appropriate.

As with the authorisation, you will be charged an annual subsistence fee for the permit. As your company holds three permits, the total fee that you will be charged is £2161 payable from 1<sup>st</sup> April 2004 (£831 for the first and second permits, £499 for third permit). You will receive a letter requesting that the payment is made by cheque in the next few weeks. Please do not send a cheque until you have received this letter.

Yours sincerely

A handwritten signature in black ink that reads "Rachel King". The signature is written in a cursive, slightly slanted style.
