In the development of the present Greenspace Strategy and collated from a number of sources a list of sites were identified and designated as allotments as part of collating a data set of greenspace sites. The Green Space Strategy identified all open space land greater than 0.1 hectare and listed 54 sites as allotments although these are effectively separate parcels of land. The allotment designation included existing allotment sites presently in use and which fall within the Council Remit, private allotment sites, former allotment sites which are no longer used as such and other sites which could potentially be used as allotments sites. When added up this list of sites totals 54 sites.
