

# We're giving homes a HUG

Fully funded energy efficiency improvements are now available across the city!

Turn over to see if you could benefit from this government grant funding.

# The Home Upgrade Grant is ready!

Coventry City Council is working with E.ON, their Strategic Energy Partner, and Act on Energy to help reduce your bills and make your home warmer and more energy efficient.

Coventry City Council has received government funding to pay for energy efficiency measures for eligible households.

Depending on the type of fuel you use to heat your home and your property type, you could have energy efficiency and/or clean heat measures\* installed.

All grants are subject to eligibility criteria, funding availability and technical survey.

\*Clean heat measures refer to home-heating technologies (e.g., an air source heat pump) that produce less greenhouse gas emissions and can be more energy efficient compared to similar solid fuel technologies (e.g., a LPG-fuelled boiler).

To be eligible you will need to meet all the following criteria:

- ▶ you are a homeowner or rent privately.
- ▶ the property **does not** use mains-gas central heating - using mains-gas for cooking only is acceptable.
- ▶ the property has an Energy Performance Certificate (EPC) of D, E, F or G - if the property does not have an EPC, then one will be arranged free of charge.
- ▶ your household has a combined annual income of under £36,000 (gross) or you live in an income exempt area (please contact Act on Energy to confirm your eligibility).
