17<sup>th</sup> August 2004 2004

Dear Mr Hemmings

**Pollution Prevention and Control Act 1999 and the Pollution Prevention and Control Regulations 2000 – Permit to Operate a Prescribed Installation**

**Process Address: Webster Hemmings & Sons Ltd, 274 Stoney Stanton Road, Coventry**

From 1<sup>st</sup> April 2000 a new pollution control regime was introduced by the Pollution Prevention and Control Regulations 2000. This affects the way your process is regulated and required you to apply for an A2 Permit.

The Regulations introduces three systems for regulation of specified industrial installations. The Environment Agency will regulate A1 installations and the Local Authority regulates A2 and Part B installations. An integrated environmental approach will be applied to A2 installations which means that emissions to air, water and land, plus a range of other activities with an environmental impact must be considered. Part B installations which are currently regulated by local authorities for air emissions will remain subject to air-only regulation.

Following consideration of your application, the City Council has granted your permit. This is attached. In the majority of cases the same conditions have been used that were in your authorisation, however there are a number of additional conditions relating to noise, water and land pollution.

If you wish to discuss your new permit please contact me on the number above. You do a right of appeal against any of the conditions, and the supplementary notes in appendix 1 of the permit outline the appeals process. You will also note from the supplementary notes that there are also changes in other areas for example, how the permit is transferred, or how you apply for changes to the permit.

The new permit supersedes your previous authorisation that is now considered to be invalid. Your permit should be retained in a safe place on your Coventry Site.

Yours sincerely

Matthew Pegg  
Environmental Health Officer
