Dear Mr Chaplin

Pollution prevention and Control Regulations 2000 (As amended). Statutory consultation for Part B application for: Superior Paint and Powder Coating, Unit 2A & 3 Curriers Close, Canley, Coventry, CV4 8AW.

Thank you for your letter dated 12th July 2006 consulting English Nature on the above-mentioned application.

We note that there are no designated nature conservation sites present within 1 km of this installation. We therefore have no comments to make with regards to this application.

Yours sincerely

Dr Helen Wake

Dear Peter,

Re: LAPPC Application for Superior Paint and Powder Coating Limited

The Health Protection Agency has received from Coventry Teaching Primary Care Trust an LA-PPC application to operate Superior Paint and Powder Coating Limited. This process principally consists of powder and wet spray industrial finishing operations.

The main emissions of concern are point and fugitive source emissions of particulates and volatile organic compounds (VOCs). However, these emissions are reduced through the employment of fully contained systems, the use of multi-filtration systems and local exhaust ventilation (LEV).

Due to the abatement systems in place, it is unlikely that there will be any impact on local human health receptors from this installation. Nevertheless, we recommend that the Regulator ensure that best available techniques are employed so that the emission limits are met, as set out in the relevant Process Guidance Note.

Local Health issues

Based on the application, this installation does not present any obvious cause for concern providing it is well managed and maintained. However, if you are aware of any health issues in this area we recommend you inform the Regulator.

Kindest regards
