

Have you ever wanted to have a say in the factors that effect your health?

Join our Public Voice Group today!

Who we are...

Coventry City Council, in collaboration with partners, are part of a national programme funded by the National Institute for Health and Care Research (NIHR). Our goal is to boost research done by councils.

Paid opportunity

What we do...

We aim to make services fairer and better for all. Almost every aspect of our lives is impacted by our access to jobs, homes, education, and transport, to name some examples. We are creating a space where local residents can come together and share their views about this. We want to create a group with members from diverse backgrounds and communities.

How we will do this...

We will meet every three months to discuss topics that are important to the communities of Coventry. The next meeting will be on **Wednesday 9th October, 2024.**

Is this for you? Do you...

- + Live and/or work in Coventry?
 - + Understand local issues?
 - + Want Coventry to thrive?
- + Care about improving the wellbeing of people from Coventry?
 - + Have connections with local groups?
 - + Know the challenges and can offer solutions?
- + Want to discuss issues that matter to you and your community?
- + Time to commit to meetings every three months?
- + Have access to send emails and receive electronic documents?
